Brazil, Ind., Sept. 24. The No. 8 miners at Ferth, who last Thursday voted without a dissenting voice to re-sume at the operators' offer, were waited upon Saturday and Sunday by delegations from the striking miners, as well as by members of the central reliof or executive committee. Their action was earnestly protested against, and they were besought to stay out till Thursday, when, it was said, all strikers would return at once. This would seeme equal concessions to all alike, and would indi-

oate union and harmony.

Word has been received that the No. 8 miners, yielding to the pressure, and in view of the promise made, voted publiely to post one their return to work until Thursday. However, many of the miners said privately that this was but an easy way of gotting rid of the delegation, and that they would return to work as originally agreed. The secret ballot system will be given a test at the next election in Connecticut. It will almost certainly result in less corruption at the polls, and the sooner it is adopted in every State the sooner will the "blocks-of-five" business of Dudley and his lik be ended.

Even the Cincinnati Commercial Gazette, that rampant Republican journal, doesn't seem very much pleased with some things President Harrison has done. A few days ago it remarked that no excuse is needed for the removal of Tanner; what is needed is an explanation of his appointment.

SENATOR Pugir, of Alabama, has been up in Boston and he says he was surprised to find the manufacturers wanting "free coal, free lumber, free iron ore, free pig iron and free fish." They seem to be getting their eyes open at last, and there is a growing sentiment in favor of a substantial reduction in the tariff.

THERE will be no mossbacks in the State Commercial and Immigration convention that meets to-day in Louisville. The meeting will be composed of wideawake citizens of Kentucky, those who are alive to the future growth of the State, and the development of her untold resources. A few determined men can work wonders, and many of those wbo meet to day-at Louisville will no doubt live to see the good resuits that must surely follow the praiseworthy cause in which they are engaged.

REPUBLICAN papers are as wide apart in their opinions of Tanner as many of them were in explaining the recent increae in the public debt. THE wealth of this "great and glorious land" is fast being gobbled up by the favored classes, and at the present rate it will not be many years before the masses will be serfs to the money kings. Thos. G. Shearman produces statistices in a recent issue of the Fornni, which are stortling In some respects. He says: "As lately as 1847 there was but one man in this more than \$5 000 000; and though some estimated his wealth at \$20,000,000, there is no good reason for believing it to have been so great. At the smallest reasonable estimate, there must be more than 250 their persons in this country whose wealth averages over \$20, 30,000 for each. But additions, Elder Morrison commences his meeting at Orangeburg the 24th of this month. tax returns show that the number of ln-comes, when arranged in large classes, when arranged in large classes, let us call the number only 200. Incomemultiplies by from three to five-fold for every reduction in the amount of one half. For extreme caution, however, we estimate the increase in the number of incomes at a very much lower rate than this. At this reduced rate, the amount of wealth in the hands of persons worth over \$500,000 each in the United States would be about as follows: 200 persons at \$20,000,000, \$4,000,000,000; 400 persons at \$10,000,000, \$4,000,000,000; 1,000 persons at \$5,000,000, \$5,000,000,000; 2,500 persons at \$2,500,000, \$6,250,000,000; 7,-000 persons at \$1,000,000, \$7,000,000,000; 20,000 persons at \$500,000, \$10,000,000,000, total, \$36,250,000,000. This estimate is very far below the actual truth. Yet, even upon this basis, we are confronted with the startling result that 31,000 persons now possess three-fifths of the whole national wealth, real and personal, according to the highest estimate (\$60,-000,000,000) which any one has yet ventured to make of the aggregate amount Nor is this conclusion at all improbable."

DEMOCRATS are taking no step bockward in the fight for tariff reform. Kentucky Democracy led off and re-affirmed the St. Louis platform. Says an exchange: "Virginia wavered a little, having local concerns of great interest and of paramount importance, but Ohio wheeled into line with a will, and Mr. Campbell, who has had his doubts heretofore, planthimself firmly at the head of the reform column. New Jersey was emphatic, and then came Pennsylvania, the State of Mr. Randall, repudiating Danaism and Randallism, and pledging its hearty support to every practical measure for tariff reform in a set of resolutions that are models of directness and clearness. The Northwest speaks through the Iowa Democrats, declaring that protection is a delusion and a snare, that it simply breeds trusts and robs the producer for the benefit of a few rich capitalists."

There is to be no wavering on this question. Democrats "mean business," and the battle for the people's cause is to be continued until the victory is won.

THE Toledo Commercial, a Republican paper, asserted before the late Republi let the mantle of justice cover it. He can convention in Ohio that "if Governor other hand, the Barbourville News, also election for Governor, or if he should a Republican journal, has no doubt that name the candidate, whether it be the Corporal "errored," and frankly says: Bushnel or anybody else, his throat "Tanner is gone and we are glad of it. would be cut from ear to ear." Foraker Pensions are a good thing, but the late is the nominee. There may not be any OUR NEIGHBORS.

J. A. White Mukes His Escape- Young Green Thought to Be Innocent of the Theft.

Mention was made yesterday of the arrest at Lexington and Louisville of J. A. White, baggage master on the N. N. and M. V. Railroad, and T. A. Green, express messenger on same road, on the charge of breaking open a trunk some time in August and steating diamonds to the value of \$800 at Lexington.

Their examining trial was set for today, but there will be no trial, as far as White is concerned, for he has succeeded in making his escape. It happened in this way: Most of the diamonds were recovered last week at Louisville. A fine ring, however, was missing and White D. Walsh and E. L. Shepard were elected informed the detectives that it was hidden along the road at a point about seventy miles east of Lexington and that he would turn it over to he was taken to the place. Yesterday morning he was placed in charge of a couple of officers, and the trio made their way to the spot. The ring was found hidden in a culvert and turned over to the minions of the law. All then boarded the train for Lexington. Shortly afterwards White was allowed to enter the water-closet. From here he climbed out the window and around on the platform and jumped off while the train was on a steep upgrade. His escape was not discovered for sometime afterwards.

White is undoubtedly the real culprit. SCHOOL BAGS, 10 Cents to 75 Cents; He is said to have given a statement ex-

The grain movement has received a marked check in the last few days. Less than 500 car-loads a day are now arriving in Chicago against 1,000 car-loads a month ago, and the falling off is fully as noticeable with the Louisville roads. It is doubtless due to the low prices offered for grain.

Weekly Crop Report.

The weekly crop bulletin of the Kentucky State Weather Service in co-operation with the U. S. Signal Service for the JOB WORK OF ALL KINDS EXECUTED IN BEST MANNER week ending Saturday, September 21, 1889, says: The weather during the early part of the week was warm for the season. On Wednesday a considerable decline in temperature occurred, which was followed on Friday by light frosts throughout the State. The damage, however, was very slight. About 50 per cent. of the tobacco crop is already housed, and with a week of good weather the remainder will be saved. The tobacco already cut is reported to be in good condition, and of excellent quality. The corn crop is fully matured and beyond damage by frost. Reports indicate that the crop will be one of the largest ever harvested in the State. Apples are very plentifui. Fall seeding and plowing progressing finely.

The Temps says that the political complexion of the new chamber will be much the same as that of the old one. Many new men are returned, however, and a fresh element is added to purlia-mentary life.
